Dr. Nigel Lockyer
MS 105
Fermilab
P.O. Box 500
Batavia, IL 60510-5011

Dear Nigel:

I would like to thank you and the Fermilab staff for all your help in mounting our test beam experiment, T-1044, at the Fermilab Test Beam Facility. The group out there in the Meson Lab was extremely helpful, knowledgeable, and professional. They helped us set up, pull down, and learn to operate the beamline in short order, and helped us respond to concerns in the safety review. We had help from Aria Soha, Ewa Skup, J.J. Skup, Bill Frank, Geoff Savage, Erik Ramberg, and Doug Jensen. Those responsible for safety, Leo Bellantoni and Eric McHugh, did an excellent job in enforcing standards without imposing needless hardship. The riggers, John and Tommy, did a great job with our detector, even though it was large enough to require opening the roof of the enclosure. Last, but not least, Todd Nebel is an extraordinary technician that you are very fortunate to have. He really guided us through the process with his great breadth of experience and good humor.

The equipment is all back at Brookhaven now and nearly thawed out, and we will be happily analyzing the results for several months, thanks to the FTBF staff.

Sincerely,

A handwritten signature in black ink, appearing to be "John S. Haggerty".

John S. Haggerty
